

SUBJ: Quick question about your website

SUBJ: Sending you leads

I noticed you don't have a way for your website visitors to text your business. [SCREENSHOT OF WEBSITE]

Without a way for people to text you, you're missing out on generating more leads and customers because text messaging is the #1 preferred form of communication

We help you generate more leads faster by giving your website visitors the ability to text your business, so you can sell more of your products and services. We do this without giving away your personal cell.

Is there a best day when you have 10 minutes to connect ? I'd love to talk about how we can get this taken care of for you.

Best,

[YOUR NAME]

P.S-Here's an example that will give you an idea on how were helping similar companies generate more leads [LINK TO DFY SITE]
